

Separation of General Wastes & Recycables (Higashiyama Campus, Nagoya University)

Burnable Waste

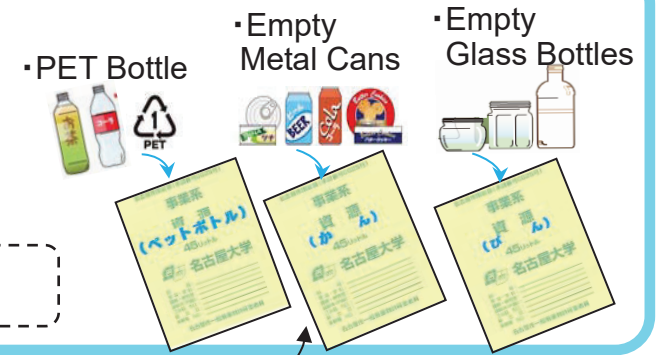

- ※1 OA paper, cardboard, leaflets can be recycled.
- ※2 Used pens and lunch boxes, etc.

- Do not throw the following contents.
- All items used in experiments
 - Flammable liquids (Thinner, Benzene, Kerosene, Gasoline etc.)
 - Explosives
 - Hazardous chemicals

Recyclables

Waste bottles or cans of food and beverage.

- Do not throw bottles used in chemical experiments.

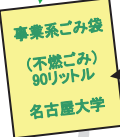

Non-Burnable Waste

- Do not throw the following contents.
- Glass products used in chemical experiments
 - ※ Even if it is unused, do not throw it away. Please ask the staff of your department.
 - Hazardous Flammable Items
 - Spray Cans, Disposable Lighters etc.
 - ※ Please put it in a special container.

Improper separation causes fires in the collection car or the factory.

Use the dedicated garbage bags.

Industrial Recyclable Waste

Plastic products, metal products, electric appliances. Throw them into the designated waste container at the university garbage station.

- Empty paint/oil cans included in this category. Do not put the spray can because it is a Hazardous Flammable Items.

- Do not throw the following contents. Please ask the staff of your department.
- Large ask exceeding 30 cm square
 - Wastes regulated by Home Appliance Recycling Law (TV Sets, Refrigerators, Freezers etc.)
 - Computers

Foamed Styrol

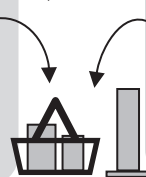

- ※ After putting Foamed Styrol in the bag, Put the "発泡スチロール" seal on the bag and discharge it.

Hazardous Flammable Items

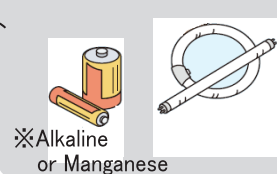

※ Do not mix it with other waste.

※ Please put it in a special container.

Dry-cell Batteries, Fluorescent Bulbs

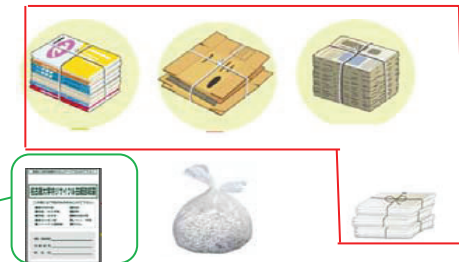

※ Alkaline or Manganese

Recycable Papers

Separate them into the following six categories.

Throw other office papers into the designated bag.

Tie it with a string.

Directly bring them to the university waste station if waste amount is large.
